

SAFETY COMMITMENT

At SECON it is our policy and primary goal to perform tasks in the safest manner possible consistent with sound construction practices. Our safety policies are designed to be, not only as the rule, but also as a guideline to help every employee attain this goal. All employees share in the responsibility to work safely and that every possible provision is made to provide as well as maintain a safe work environment.

SAFE WORK ENVIRONMENT

We recognize that every project is different and every job site is unique. Our clients and employees alike can be assured that our safety program, training and protocol demonstrate our commitment to the incident-free completion of our projects. Thus reducing and eliminating costly delays.

Our creation and maintenance of a safe working environment requires the interest, cooperation, and dedication of every employee in our organization from managers and foremen to field crews. The safety and well-being of all employees and customers is priority number one.

SAFETY TRAINING

Being pro-active is where it all starts. We make sure all of our employees are fully trained and educated in all aspects of construction safety. Our Foremen are all OSHA 30 qualified and our field employees are all OSHA 10 qualified. Once a month mandatory safety meetings are required by all field personnel. Because of these practices SECON is able to maintain an EMOD rating of .64 or below.
